

# software at awisa

## *who, what, where, when*

*Its not entirely new anymore but software and its use in design, manufacture and management of the kitchen, furniture and cabinetry business remains a difficult terrain to negotiate for many. AWISA provides the ideal opportunity to cover a lot of ground quickly and establish contacts with a variety of suppliers and discover which are the most applicable for your particular requirements. We assist in the process a little by providing a quick look at who will be there and where to find them.*

### Empower Software

Time Tracking Jobs and Staff - and Job Scheduling. Factory Productivity Software. Designed for the manufacturers of kitchens, Shop fitting, Timber Joinery, all forms of furniture, boat building and all forms of engineering.

Empower uses several 2nd hand PCs on the factory floor wired to your production manager's PC - which provides "Live" information from the factory floor tracking and reporting on: the "live" status of all jobs, "live" times of jobs (actual times consumed right now "live" vs budgeted times), and the productivity of each staff member "live".

Empower is easy and quick to implement. Empower is a low investment cost and full return on investment can be within 3 months. Empower are specialists in our field and provide full training and full package to get you started. Empower Software has proven success. We have achieved gains of between 15 to 160% across 83 of our manufacturing clients. Some of the most progressive manufacturers in each industry use Empower Software to maximise their productivity.

**Free video in DVD form from kitchen, timber joinery, and furniture manufacturers discussing their businesses and the productivity gains that they have achieved using Empower. Contact us anytime [seanos@ihug.co.nz](mailto:seanos@ihug.co.nz) and we will forward you this DVD free of charge. Our web site is [www.empowersoftware.biz](http://www.empowersoftware.biz) AWISA Stand Number 4314.**

Saving you time and money

Almost as easy as ...

# 1-2-3

Design2Cam software is focused on saving you, both time and money.

Gone are the days of you spending hours designing with pencil and paper and then "guestimating" a price for the job! ... only to find you have to start all over again when they make a change.

Our streamlined software allows you to do these processes easily and speedily from receiving the initial enquiry right through to production.

Almost all your processes are linked seamlessly with our fully integrated software that allows you to:

- Gather customer information
- Create stunning 3d designs that your clients can visualise
- Print a proposal, manufacturing information, Suppliers orders and link through to your saw or NBM.

Whether you're a one man band or corporate, our software is designed to make your business work smarter not harder.

**New versions and special prices available to you at AWISA. Want to know more - come and see us and try for yourself, Hall 4, Stand 4315.**

### Added Extras

Microvellum would like to announce that Auto Kitchen is now joining the Microvellum range of products. This means that existing Auto kitchen customers can now take advantage of the powerful manufacturing tools that Microvellum offers. Microvellum customers can also benefit as Auto kitchen is an excellent easy to use design and estimating package, with unparalleled photo realistic rendering. For those who are not familiar with Auto kitchen it is a true 3D residential kitchen and bath design solution. It comes with a 3D cabinet library which can be customised, and you can choose from a huge range of Australian and New Zealand appliances, materials, accessories and door and handle styles. The best part is that Auto kitchen links to both of Microvellum's products Toolbox and AMI. AMI is a single part editor with library capabilities, that also nests and generates part labels and manufacturing reports. It is also upgradeable to our flagship product, Toolbox. Toolbox is the ultimate design and manufacturing package. Build anything from high end kitchens, caravans, boat fitouts, shopfitting, wardrobes, office furniture and custom detailed joinery. Toolbox handles all aspects of manufacturing, design, cut listing, optimization, costing and generating CNC code all in the one easy to use programme.

**Come and see us at AWISA for a demo at stand number 2123, next to the cafeteria in hall 1. If you cannot make AWISA call us for an online demo or visit our web page at [www.microvellum.com.au](http://www.microvellum.com.au)**
