Key Points on Empower Software:

Empower Software enables us to:

- accurately track times on jobs
- accurately back cost jobs
- accurately measure actual to budgeted performance
- report live work in progress from our factory floor
- establish database of times on jobs to allow us to form accurate standard times on jobs for quoting
- see clear information regarding our pipeline of future work

We adopted Lean Manufacturing which is about managing wastage. It would be impossible for us to measure our performance regarding our labour wastage without Empower. We regard Empower HQ as a strategic partner to our business. We regard Empower Software as an essential tool and we could not contemplate running our business without Empower in the future.

Anyone is welcome to phone us to discuss Empower Software
